# TravelCam Week One Task Document

**UI/UX Team: Engr Fien**

- Design the logo and icon of the application in both light and dark mode
- Design the UI/UX of the layout and major Screens of the Mobile app (mobile app team strongly depend on this being completed)

**Web Frontend: Engr Mac Junior, Engr Selamo**

- create branch (feat/admin-layout)
- Design the admin panel layout for agencies taking references from the class diagram (in case of any question about the class diagram feel free to ask)
- Properly set the folder and file structure of the entire admin frontend project

**Web Frontend: Engr Mac Junior, Engr Salemo, Engr Cedric, Engr Perly, Engr Favor**

- Each Individual creates appropriate branches (feat/…...) per task assigned to them
- Immediately after the admin layout (**Engr Salemo and Engr Mac**) Assign task to the various frontend dev to come up with the respective page

**Web Frontend: Engr Jordan**

- Create branch (feat/administrator-layout)
- Design the Administrators layout within the backend folder using Blade Template (make sure to maintain responsiveness and properly layout). You can use bootstrap when necessary

**Web Frontend: Engr Praise, Engr Mohammed**

- Create branch (feat/administrator-pages1, feat/administrator-pages2)
- Design The various pages ( Dashboard, Agencies, SEO, Analytics, Settings) using blade template using the layout done by **Engr Jordan**
- You can user bootstrap when necessary (for tables, responsiveness etc)
